Evergreen Oil & CEP Re-refining Technology Presented In Mexico.

As part of the Trade Mission to Mexico organized by the office of Governor Arnold Schwarzenegger in November 2006, Evergreen Oil and Chemical Engineering Partners were invited to participate in a California Energy and Environmental Technology Exposition in the City of Monterrey, Mexico's foremost industrial center.

Purpose of the Expo was to showcase California technologies for a cleaner environment and sustainable economic growth available from leading environmental companies in the State representing the best examples of green products and services that California has to offer in the field, and to facilitate trade with Mexico.

Governor Arnold Schwarzenegger visited the Evergreen/CEP booth at the Monterrey Environmental Expo, and congratulated the company represented at the event by its Chief Financial Officer Jesus Romero, for its long standing commitment to the protection of the environment in California and its extraordinary efforts in offering a state of the art re-refining technology to other countries for a better global environment.
